

Manikandan Marimuthu

+1 510-322-4262 | Riverview, Florida | manikandan.marimuthu@gmail.com | [LinkedIn](#)

Professional Summary

- Experienced and results-driven **Technical Architect/Lead** with over 15+ years of expertise in designing and delivering scalable, efficient innovative technology solutions.
- Extensive hands-on experience in Java, Spring Boot, Microservices, Hibernate, RESTful APIs, and cloud platforms (AWS/Azure).
- Skilled in leading cross-functional teams, implementing best coding practices, and ensuring high-quality deliverables.
- Over 10 years of onsite experience in the USA and Europe, working with leading global banks such as Credit Suisse, US Bank, Standard Bank of South Africa, Muscat Bank, Allied Irish Bank, and Citi Bank

Skills

Category	Technologies/Tools
Architecture & Design	Microservices, SOA, Event-driven architecture
Programming Languages	Java 8/11/17, Python, SQL, JavaScript
Frameworks & Technologies	Spring (Core, Boot, MVC, Security), Hibernate, JPA
Microservices & APIs	RESTful APIs, GraphQL, API Gateway
Cloud & DevOps	AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins, CI/CD
Front-End Technologies	Angular, JavaScript, TypeScript, JSP, HTML5, CSS3
Messaging & Streaming	Kafka, RabbitMQ, Active MQ
Databases	Oracle, MySQL, PostgreSQL, MongoDB
Testing & Security	JUnit, Mockito, SonarQube, OAuth2, JWT, SSO
Tools & Version Control	Git, Bitbucket, Maven, Gradle, JIRA
Methodologies	Agile (Scrum, Kanban), TDD, BDD, CI/CD
AI & Machine Learning	Deep Java Library (DJL), DL4J (Deeplearning4j), Weka, TensorFlow, Keras, PyTorch, Scikit-Learn, NLP, Computer Vision, Spring Boot AI Integration
Leadership & Collaboration	Team management, stakeholder communication and project delivery

Accomplishments:

- Led migration to microservices:** Refactored legacy monolithic applications into microservices, improving maintainability and reducing downtime by **50%**
- Enterprise Architecture & Scalability:** Designed event-driven architecture using ActiveMQ increasing system throughput by 35% and enabling real-time data processing
- Enhanced CI/CD pipelines:** Developed and implemented a CI/CD pipeline using Jenkins, Docker, and Kubernetes, reducing release cycles from **weeks to hours**
- Implemented secure coding practices, reducing security vulnerabilities by **70%**, ensuring compliance with industry standards

Certifications / Professional Awards:

- Microsoft Certified Professional (MCP) MS AZURE Certification – “Architecting Microsoft Azure Cloud Solutions”
- AZ-900 Azure fundamentals
- Infosys certified J2EE Architect

Professional Experience

- Currently working as a “**Technical Architect/Lead**” on deputation in **Citigroup Inc Florida** from May 2018 to present.
- Worked as a **Technology Architect in Infosys Technologies, Bangalore** from Feb 2012 to May 2018
- Worked as a **Technical Lead in Wipro Technologies, Bangalore** from Oct 2005 to Jan 2012

Know your Customer (KYC)

Technology Architect/Lead | Citigroup Inc Florida USA | May 2018 to present

The **Know Your Customer (KYC)** solution is a critical Citi component of customer due diligence, implemented when establishing or periodically renewing a business relationship. It ensures compliance with regulatory requirements, such as customer identification procedures, to safeguard against financial crimes, including money laundering and illegal financing activities. This project aims to enhance the KYC process by integrating the **Treasury and Trade Solutions (TTS)** digital account opening experience, offering a seamless and secure onboarding process for institutional clients. Initially implemented in North America. Later this enhancement extended to 50 countries across Europe, Latam & APAC providing an efficient, digital-first approach to KYC and account management

Responsibilities

- **Architected and Led KYC Solution Development:** Designed and implemented end-to-end solutions for Know Your Customer (KYC) processes, utilizing **Java & J2EE technologies** to meet compliance, security, and performance requirements
- **Integration of Digital Account Opening (TTS):** Spearheaded the integration of **Treasury and Trade Solutions (TTS)** for digital account opening, enabling a seamless experience for institutional clients across North America and Western Europe
- **API Design and Integration:** Designed and implemented **RESTful APIs** and integrated with **third-party services** to ensure smooth data exchange for KYC processes, including customer identity verification and risk assessments.
- **Security and Compliance:** Ensured adherence to **regulatory standards** (e.g., AML, KYC) by designing secure and compliant data flows, including the use of **OAuth2, JWT, and SSL/TLS** for data protection
- **Stakeholder Collaboration:** Collaborated with business stakeholders, project managers, and regulatory bodies to define and refine **business requirements**, ensuring that the technical solution met both functional and compliance needs
- **Quality Assurance:** Led the effort to implement automated unit and integration testing using **JUnit, Mockito, and SonarQube** to ensure high-quality, bug-free delivery of KYC functionality

Environment : Java 8, Spring Framework, Hibernate , Angular , Active MQ , Spring cloud Microservices , Tomcat , Oracle Database 11G, Tomcat, Redhat DMN

Hint Platform Solution – Emerging Tech COE

Technology Architect/Lead | Infosys Technologies Bangalore | Nov 2016 to Apr 2018

The **Hint platform** efficiently organizes knowledge and provides intelligent search functionality to rapidly locate relevant information, including text, images, and audio. Leveraging advanced technologies such as **NLP**, **Tensor flow**, **Machine Learning**, and **Solr**, it enhances the search experience. The platform also features applications like **Email Appreciation**, which ranks resources based on received emails, and **IITP**, which recommends profiles for job descriptions through an intuitive, user-friendly interface

Responsibilities

- **Platform Architecture & Design:** Led the design of the Hint platform, integrating technologies such as NLP, Big Data, Machine Learning, and Solr for effective knowledge organization and search optimization.
- **Smart Search Optimization:** Directed the development of intelligent search features for quick access to text, images, and audio, enhancing performance and accuracy through advanced algorithms.
- **Feature Development & Implementation:** Spearheaded key features like Email Appreciation (ranking resources based on received emails) and IITP (recommending profiles for job descriptions).
- **Team Leadership & Mentorship:** Managed a team of developers, providing guidance, conducting code reviews, and ensuring adherence to best practices and coding standards.
- **Collaboration with Stakeholders:** Collaborated with business stakeholders to translate requirements into technical solutions, ensuring functional and performance goals alignment.
- **Technology Integration:** Oversaw the integration of NLP and Solr technologies, improving search capabilities and scalability across large data sets.
- **Innovation & Research:** Stayed up-to-date with emerging technologies in machine learning, big data, and search algorithms, applying innovative solutions to enhance the platform's capabilities.
- **System Performance & Monitoring:** Led performance monitoring and troubleshooting efforts, ensuring optimal platform scalability, uptime, and search accuracy.
- **Cross-functional collaboration:** Worked closely with product managers, data scientists, and designers to deliver a seamless, high-performance platform.
- **Exploring Emerging Technologies:** Identified and implemented relevant emerging technologies to solve application challenges and improve overall functionality.

Environment : Java, Microservices using Netflix OSS ,Angular , Docker , Machine Learning ,Artificial Intelligence , Apache Solr ,NLP , Spring Boot , Mongo DB , Tomcat , Apache POI

AIB Bank Ireland- Payments System – Application Development & Support

Technology Architect/Lead | Allied Irish Bank , Ireland| Oct 2015 to Oct 2016

This payment application integrates various payment channels, such as internet banking, mobile apps, and branch systems, with backend systems like Flexcube and OLA. It supports both SEPA and non-SEPA payments, including local and international transactions.

- Leading technical workshops with the client's business and tech teams to design banking payment solutions.
- Designing the integration approach for AIB's payment system.

- Automating performance testing of AIB Payments using CI/CD with Jenkins.
- Automating continuous build and deployment for sprint deliverables.
- Mentoring and providing technical guidance to team members.
- Ensuring code quality, performance, and architectural standards are met.

Finacle Business Correspondent (BC) Model -Reliance Payments India

Technical Lead | Infosys Technologies Bangalore | Oct 2014 to Sept 2015

Reliance Payment Solutions Limited (RPSL) aims to create a simple and secure digital payment solution for everyone in India, expanding its business with

new technologies and payment methods. To achieve this, Infosys proposed implementing FDC, which helps banks and clients reach more customers cost-effectively through Agent Banking.

- Involvement in Requirement gathering session with Reliance Business Stake holders
- Participation & Finalizing the design and solution for the BC Implementation with the various vendors by attending the multiple technical workshops conducted by RIL
- Proposing technical solution for Interfacing with external systems presents in Reliance Eco System.
- HA Environment Setup & Technical governance for developing the Use case module / component / service with a team in Agile methodology
- Responsible for reviewing the architecture and proposing architectural changes if any
- Responsible for Code Quality, performance and architectural conformance

Finacle E-Banking – Monitoring Tool Implementation – Muscat Bank , Oman

Technical Lead | Infosys Technologies Bangalore | July 2014 to Sept 2015

This monitoring tool will track both the Financial & Non-Financial Transactional requests posted by E-Banking system against the various Host Systems it interfaces with.

- Involvement in Requirement gathering phase of Monitoring tool with Bank Muscat Business stakeholders
- Designing & Architecting the optimized solution approach for Monitoring tool
- Proposing technical solution for Interfacing with Bank Muscat Interfacing systems.
- Review of test cases to ensure no requirements being missed out

Agency Banking Product Implementation -Bank of SouthAfrica

Technical Lead | Infosys Technologies Bangalore | Feb 2012 to June 2014

One of the leading banks in South Africa has embarked on a major corporate initiative to refresh/build out the Internet channel as well as extend bank services to customer thru a channel called 'Agency Banking'. The goal of this project is to extend the bank services to the end customer thru Agents by using this 'Agency Banking' business solution. Using this solution, Agent will assist the customer on their day to day bank operations like Cash Deposit, Funds Transfer, Cash Withdrawal, Voucher Issuance, Airtime Top up, Device Maintenance etc.

- Involvement in Requirement brainstorming session for Agency banking product with Business Analyst and Standard Bank business stakeholders .

- Proposing technical solution for Interfacing with Finacle systems -SSO (Single Sign on) ,FAS , ESB etc
- Hands on code development & POC Creation for critical modules of Agency Banking Customization Requirements.
- Meeting all the SQA gating criteria's in each SDLC phase for the completed work with in the defined project schedule

Student Loan – Apply Release 5 | US Bank

Technical Lead | Infosys Technologies, Bangalore | Apr 2010 to Jan 2012

The Bank has embarked on a major corporate initiative to refresh/build out the Internet channel. The goal of this project is to extend the online application platform to provide student loan to the web based customers. Using this application online customer can apply for student Loan and to enable co-signers to fill in the application form and submit it separately.

- Involvement in Requirement brainstorming session.
- Designing the optimized solution approach for this Student loan primary applicant and cosigner module
- Preparation of DIT testcases to ensure no requirements being missed out
- Guiding the team technically for CUT completion on time
- Meeting all the SQA gating criteria's in each SDLC phase for the owned module with in the defined project schedule
- On time delivery of the module and production implementation support
- Knowledge transfer to production support team for the completed modules

SUSTAIN CTS APPLICATION -GMAC Insurance USA

Technical Lead | GMAC Insurance Missouri USA | Oct 2007 to Mar 2010

Continuous Technology Solutions (CTS) is the strategic Insurance policy management system. CTS application handles Auto (private auto and RV) business for agency, direct (call center) and e-commerce (internet) channels. It includes various enterprise applications like CUI,Blaze Rules Engine,Refdata Maintenance & Services,CTS Cash,Policy Admin,Rating,Print etc.

- Defect coordination with business for every production release,
- Providing Problem ticket resolution and handling Application outages at onsite with in SLA
- Driving the offshore team towards project goals & success
- Mentoring the team in adhering to the process formulated by wipro at client place
- Achieving the complete Client satisfaction on all the production support applications by wipro

Portugal Transition - Dun & Bradstreet (D&B) , UK

Module Lead | Wipro Technologies Bangalore | Dec 2006 to Oct 2007

Portugal (PO) Transition involves transferring Portugal Backoffice processes from D&B platform to Informa's owned Backoffice platform, which enables Portugal to take on their billing business processes by own.

- Involved in requirement analysis
- Preparation of Functional and Design spec

- Involvement in coding and unit testing for the critical components of this project namely PurchaseFeed ,Sales Feed and GMSSubrStatusUpdate and AuditQListener modules
- Integrated testing and Implementation activities. Preparation of SMTD and runbook for this project support

Intel Online Reengineering - Dun & Bradstreet (D&B) , UK

Senior Software Engineer | Wipro Technologies Bangalore | Jan 2007 to Nov 2006

D&B has partnered with various partners to manage the data collection & delivery operations in certain markets. The data collected by various markets (partner & D&B countries) will be delivered on the D&B Worldwide network to enable the customers spread across the globe make business decisions with insight.

- Involved in requirement analysis
- Involvement in higher-level Coding and unit testing, implementation, integrated testing, debugging
- Preparation of SMTD and runbook and System testcases

CMMI Internal Assessment Tool – Credit Suisse, Switzerland

Software Engineer | Wipro Technologies, Bangalore | Oct 2005 to Dec 2006

- Involved in requirements analysis
- Developing prototype & POC according to the client requirements
- creation of storybook to explain the workflow

Education:

B.E in Computer Science & Engineering from A.A.M Engineering College, India.
